

## Math 132 - Topology II: Smooth Manifolds. Spring 2017.

### Late Days Policy

Contact: [gmelvin@math.harvard.edu](mailto:gmelvin@math.harvard.edu)

1. In order to make use of the Late Days Policy a student must email me (at the above email address) **before** homework is due on Wednesday to indicate that they will be making use of the Late Day Policy.

If a student does not contact me before homework is due on Wednesday indicating that they wish to make use of the Late Days Policy, their homework will not be counted towards their final homework score.

2. A student will only be able to use a maximum of 4 late days per homework.
3. Here's a breakdown of how the late days are distributed:

- (a) **1 day** - homework submitted before Thursday, 4pm.
- (b) **2 days** - homework submitted before Friday, 4pm.
- (c) **3 days** - homework submitted before Saturday, 4pm.
- (d) **4 days** - homework submitted before Monday, 1.15pm.

Homework submitted after Monday, 1.15pm, will not be counted towards your final homework score.
