

MA 262 Homework 9: Flux is just a passing through.

There are just a few problems on this assignment. You should also be studying for the exam and working on your project. These problems are just intended to give you some practice with the concepts discussed in class.

On page 418 do problems 18, 19, 20, 21, 22. To find the surface area of a parameterized surface integrate the constant scalar field 1 over the surface.

On page 438 do problems 1 and 2b.
